GARDEN SEEDS

In response to many inquiries from our friends and customers we have added a complete line of garden, field and flower seeds to our list of reliable poultry and dairy necessities. For a number of years we have experimented with seeds at our experimental farm in West Simsbury and now feel certain that we have selected the best and most reliable growers to supply our seed requirements. As in our other offerings, quality is paramount, and any seeds we send out will be of high vitality and germination, and priced at the lowest figure compatible with quality.

HOW TO ORDER

Our terms are cash with order. The nature of the seed business does not permit us to do otherwise. **WE WILL** pay postage or transportation charges on all small seeds. **WE WILL NOT** pay postage on Peas, Beans, Corn, Onion Sets or Grass Seeds. Please include postage with your remittance.

Seed prices subject to change

QUALITY FIRST

We require a deposit of 40c for bags used on all single items of more than 25 lbs. This will be refunded you when the bags are returned.

(Flower Seeds—See page 10)

SPECIAL SEED OFFER

On 10c package seeds only, we will include free two extra packages, your choice, with each order for ten packages or more. This is equal to a discount of 20%.

In accordance with the practice of all reliable seed houses, we wish to make the following announcement:

We give no warranty, expressed or implied as to description, quality, productiveness or any other matter of any seed we send out and will be in no way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned and money that may have been paid for them will be refunded.

FYLER PRODUCTS, Inc.
Hartford, Conn.

Send in your orders early and help us to fill them promptly.

We offer excellent stocks of the following choice Vegetable Seeds. Should there be any varieties we do not list which you would like to plant, let us know. We can secure them for you.

We would be pleased to quote prices on large quantities and solicit your inquiries.

Farms
Branford, Conn.
Guilford, Conn.

The Fyler Chemical & Supply Co., Inc.
Hartford, Conn.

Gentlemen;

The past season we planted some fifty acres of corn, all corn was treated with FYLER'S CRO-CUS and we found that the seed fed through the corn planter with no difficulty and that the treatment was effective in keeping the crows, pigeons etc. away. We also found that this product in no way retarded the normal growth of the seed.

We have used other products and find that FYLER'S CRO-CUS beats them all.

Yours very truly,

H. L. Page
Manager, Rollwood Farms.

FIELD SEEDS

The alert poultry and dairy farmer realizes that his stock must be fed with green foods fully as much as with prepared foods.

Mangel beets are excellent for poultry and are unexcelled milk producers for cattle. Field and ensilage corns furnish much needed food for cattle in the winter, while millets, sudan grass and grains are splendid for forage crops during the summer. Our field seeds are of high germination and purity and are as nearly free from weed seeds as present day science permits.

DIVCO TATTOO PROTECT YOUR POULTRY

The Divco Tattoo is Painless, Permanent. Easy to use. The "Divco Poultry Tattoo" puts indelible, identifying mark on skin, but in no way injures bird or flesh.

The "Divco Sel-Inking Tattoo" is all in one piece; can't get out of order; nothing to injure user. Easy to handle—small but strong. One, two or more symbols. Serial numbers.

The outfit includes: One "Divco Tattoo" with your registered mark; one stick of Chinese

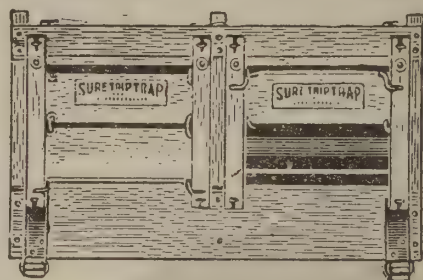

tattoo ink—guaranteed harmless; one brush for applying ink; one small sponge; complete, explicit directions—registration and identification card; two protective signs for use on premises. All packed in a sturdy box. Price, Postpaid, **\$2.95.**

"DIVCO TATTOO" complete outfit with special letters or numbers, or both (not more than four characters) **\$5.85**

"DIVCO TATTOO" complete outfit with special device or monogram (not over 3/8"x1" space) **\$9.85**

Tattoo stick-ink—guaranteed permanent and harmless, enough for 500 markings **4 for \$1.00**

The best trap nest front. Fits any nest. One size for all breeds. Positive, accurate, inexpensive—cheaper than you can build your own traps and far more efficient. Used by dozens of State Poultry Departments and Egg Laying Contests.

“Surety Cushion” Wooden Egg Cases

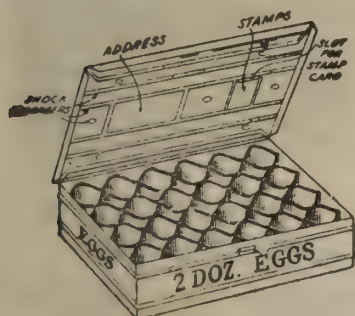

(Patented)

Every egg safely packed in an individual egg pocket. Cases are made of wood and are strong and serviceable. Indorsed by leading Agricultural Colleges and Poultrymen. Write for prices and descriptive literature.

Size	Price Per Case	Average Weight Per Case
2 Dozen Eggs	\$1.65	6 lbs.
4 Dozen Eggs	1.90	7 3/8 lbs.
5 Dozen Eggs	2.00	8 lbs.
6 Dozen Eggs	2.10	8 1/2 lbs.
8 Dozen Eggs	2.35	9 1/2 lbs.
10 Dozen Eggs	2.60	10 3/4 lbs.
12 Dozen Eggs	2.85	12 1/2 lbs.
15 Dozen Eggs Metal	3.25	14 lbs.
30 Dozen Eggs Strapped	4.75	25 lbs.

Prices F. O. B., or add postage (see page 4)

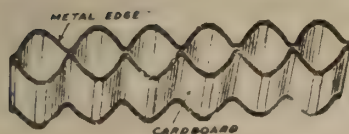

The 30 dozen sizes cannot be shipped by parcel post. Metal strapping 15c. extra on 2, 4, 5 and 6 dozen sizes and 20c. extra on 8, 10 and 12 dozen sizes. The 15 and 30 dozen sizes only come metal strapped. We recommend strapping as it adds months of extra wear to the case.

O. K. Poultry Litter

Properly Prepared Peat Moss
Sanitary—Economical

O. K. Poultry Litter places the birds "close to nature". Though confined in an artificial environment, the birds are provided with a near approach to natural conditions, where they can scratch, pick and wallow in a clean, sanitary bed closely resembling the floor of the forest. It means busy, healthy, hungry, singing hens—hens that lay and, therefore, hens that pay.

O. K. Poultry Litter is ideal to use in coops, scratching pens and other places where birds are kept confined.

Every bale is guaranteed to cover 240 square feet, 1 inch deep, irrespective of weight.

Purchase by bulk—not weight.

F. O. B. Your Station

The No. 7 Newtown Coal-burning Colony Brooder was designed especially for single room brooder houses, approximately 6x8 to 10x12, and flocks of 200 to 300 chicks.

The Nos. 11 and 12 Brooders were designed especially for two-room colony houses, or large single room buildings. The No. 11 approximately 240 square feet and up to 500 chicks, and the No. 12 for 400 square feet and up to 1,000 chicks.

We use the No. 12 Brooder at our Experimental Farm. The majority of our big poultrymen use Newtown because experience has proved this is a machine that meets their needs. Write us for circulars on the Newtown.

CEL-O-GLASS

U.S. PATENT 1,580,287

For Light, Health and Protection

CEL-O-GLASS is a lightweight material that admits light almost as freely as clear glass. It is hailproof, heatproof, cold proof and weather proof.

It lets through the healthful ultra-violet rays of the sun which are so valuable in poultry raising. Glass absorbs these rays and does not let them pass.

When used for poultry house fronts and lights, laying houses, colony houses and brooders, CEL-O-GLASS makes chicks grow faster and lay more eggs, and prevents leg weakness.

CEL-O-GLASS is used at the Poultry Farm of the United States Department of Agriculture, and at the Experiment Stations of Connecticut, New Jersey, Pennsylvania, Ohio, Georgia, Iowa, Alabama, Nebraska, Wisconsin, Washington, and others in the United States and Canada.

CEL-O-GLASS is easy to install, a hammer and staples are the only tools needed.

"STRONG" built Poultry Houses use Cell-O-Glass (see pages 28, 29).

USED IN

Poultry houses
Hog houses
Dairy barns
Storm doors
Back porches
Garage doors
Cold frames
Barns

We Announce the "S T R"

"Strong" houses are built on plans furnished by Roy E. Jones, Extension Poultry Specialist, cooperating with the Conn. Agricultural College at Storrs, Conn., where special attention is given to poultry raising. Mr. Jones says that proper warmth in winter and good ventilation at all times are essential in poultry houses. Too many people think that a poultry house can be knocked together in most any way. And so it can, but compare the results with a scientifically planned house. Poultry raising pays big money when properly done, but it takes real thought and brains to do it, and our houses are the very latest development of best minds.

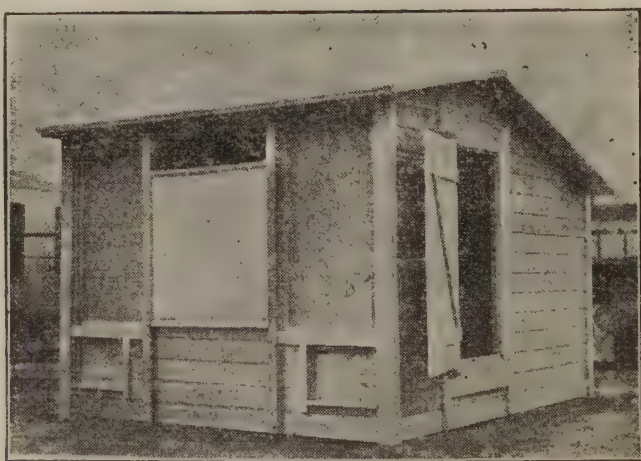

Mr. Jones has proved conclusively that the so-called "open front" (south exposure) gives the best ventilation and protection when the house is properly constructed, so a considerable portion of the front of our house is cloth attached to frames that slide up and down.

It has been proved that Ultra-Violet rays will do wonders in poultry raising. It kills germs, prevents leg weakness in chickens, increases egg production, and greater hatchability. So all of the large openings in the front of our brooder house are cel-o-glass (see page 27) and in the laying house, cloth frames only.

"Strong" houses are made in sections that are easily and quickly assembled even by a layman. The exterior is the best grade of novelty siding. 2 in. by 4 in. rafters are used in the smaller houses and 2 in. by 5 in. in the larger. Two ply roofing is furnished for covering the roof. They look well enough to put in the front yard. One of our customers said, "They are good enough to live in."

All outside doors are a door within a door. The inner door opens, leaving a screened door which opens independently. (See 8x10 house). All window openings are covered with 1 in. mesh wire netting. All roosts are removable and separated from dropping board by 2 in. mesh heavy wire netting, which keeps fowls from the dropping board. Partitions are 1 in. mesh wire netting with connecting door. All our houses are 5 ft. high in the rear and 6 ft. high in the front.

"Strong" houses have the features that scientific investigation and practical demonstration have found to give the best results.

Brooder and Laying House 8x10.

Front 8 ft., depth 10 ft. 2 cel-o-glass windows 26 in. by 48 in. in front open inward, cloth window 2 ft. 9 in. by 3 ft. in center of front slides up and down on outside, glass window 22 in. by 32 in. opposite door, removable dropping board 3 ft. by 7 ft. 6 in., 15 ft. of roosts, 7 nests attached to underside of dropping board.

O'N G" Built Poultry Houses

Brooder and Laying House 12x12

Cloth windows 3 ft. by 5 ft. in center of front slide up and down on outside. 2 cel-o-glass windows 3 ft. by 4 ft. in front open inward. Glass window 22 in. by 32 in. opposite door, 2 removable dropping boards each 3 ft. by 5 ft. 7 in., 24 ft. of removable roosts, 10 nests in 2 sections attached to under side of dropping board.

20x30 Laying House

3 cloth windows each 3 ft. by 4 ft. in front between doors slide up and down, 2 doors 3 ft. 6 in. wide either side of windows in front, 4 glass windows 30 in. by 30 in., 2 in each end 3 glass windows 18 in. by 31 in., opening outward in rear under dropping boards, 3 separate dropping boards 5 ft. by 9 ft. 9 in., separate sections of 117 ft. of removable roosts. (Both dropping boards and roosts can be moved forward 1 ft. for better ventilation in warm weather) 28 nests in 2 tiers of 14 each in one end of house.

RESPIRATOR

An absolute necessity at all dusty work and spraying operations. Protects the nose, mouth, throat and lungs.

Worn at dusty packing, grinding, mixing, polishing and powdering, handling cement, fertilizer, drugs, lime, soap, powders, dry color, bedding, dusty food products, textile materials, bronzing dust, dry inks, spices, and hundreds of other dusty materials. Farmers wear this respirator for threshing, tractor work, cleaning buildings, spreading fertilizers, handling crops, treating wheat for smut, using powders for cereal diseases and rat control, and for spraying and dusting trees and plants.

The Wilson Dustite Respirator No. 2 is an absolute necessity for spraying paint, lacquer, and automobile coats. Price, \$2.25 each prepaid.

RID YOUR POULTRY OF WORMS

Gets Rid of Worms—Without Sickening Chickens, Affecting Egg Production or Fertility

The **GIZZARD CAPSULE** is a combination worm medicine for the Round, Tape and Pin Worms, contained in an insoluble capsule. Being insoluble, this container keeps the medicine from coming in contact with the membrane lining of the mouth, throat, crop or glandular

stomach. In the gizzard the capsule is ground up, like a grain of corn, releasing the medicine which quickly passes directly and in full strength into the intestines.

A vermifuge or medicine strong enough to get the worms may sicken a chicken, or may even cause injury to the delicate organs through which it must pass to reach the worm-infested intestine. The **GIZZARD CAPSULE** prevents all that.

THE **GIZZARD CAPSULE** is not only easy to give and safe, but also far more effective, because it reaches the worms with the correct dose undiluted and in full strength.

Worms Cause Heavy Losses

Worms sap the strength and disease-resisting power of the birds and render them unprofitable. Worms also affect fertility. Look for these costly parasites the next time you prepare a chicken for your table. Give **GIZZARD CAPSULES** when needed.

50-capsule package, \$1.00; 100-capsule package, \$1.75; 500-capsule package, \$7.00; 1,000-capsule package, \$12.00. All Postpaid.

"RED MITE" RECOMMENDATIONS

We are proud to reproduce a few letters (at random) from satisfied users of **FYLER'S RED MITE DESTROYER**.

"FIRST THOUGHT—A YEAR APART"

"Dear Sirs:

Conn., Aug. 24, 1928.

I have used your Red Mite Destroyer at intervals of a year apart and my houses are absolutely free from these pests. It should be the first thought of the poultryman."

H. TROWBRIDGE.

"SHALL RECOMMEND IT TO OTHERS"

"Dear Sirs:

Maine, Aug. 18, 1928.

Am sending check for \$6.00 for 5 gallons more of Fyler's Red Mite Destroyer. I have not had a mite for 8 years but this summer my houses have been so bad I did not like to pick up the eggs. I have used about two quarts of the gallon I sent to you for and can get my eggs fine. Wherever I find them it kills them. Shall keep on using this and when the houses are cleaned this fall I think I will get them down pretty well. Shall recommend it to others."

MRS. C. J. WEBBER.

"BEST EVER"

"Dear Sirs:

Mass., Oct. 4, 1928.

We received the Fyler's Red Mite Destroyer, have given it one trial. So far it has worked very good and believe it is the best we have ever tried. Enclosed please find money order for same."

J. J. ISENSEE.

"FELLOW 4-H CLUB MEMBERS"

"Dear Mr. Fyler:

Conn., September 21, 1928.

Received your one quart bottle of Red Mite Destroyer Saturday the fifteenth. I used it in my brooder house and the result was the very same as the directions stated and I can say it is very satisfactory. I will recommend it to fellow 4-H Club members.

Thanking you for the prize,"

ROBERT WELCH.

"POWERFUL DISINFECTANT"

"Gentlemen:

Conn., Oct. 26, 1928.

Have used your Fyler's Red Mite Destroyer one year, just to be sure no Red Mites will show up and none have. It also seems to be a powerful disinfectant too. If it is and of course you know, why don't you say something about it."

T. B. WICKWIRE.

Meet us at our Booth, No. 337

"GEORGE LOWRY" says (See on preceding page)

FYLER'S RED MITE DESTROYER

THE WONDER SPRAY

Red mites are one of the greatest handicaps in poultry raising. They live and breed on the roosts, dropping boards and surrounding walls, infesting the birds only at night when the birds are on the roosts. They suck the blood from the bird, weakening its vitality, and may cause spread of disease. Fyler's Red Mite Destroyer will not only destroy this vermin but when used at proper intervals will keep a coop free from them.

Red Mites do even greater damage if allowed to get established in colony houses where growing stock are roosting. With new buildings it is advisable to spray with Fyler's Red Mite Destroyer before they are used.

FYLER PRODUCTS, Inc.
135 Grove St.,
Hartford, Conn.

Dear Mr. Fyler;

From my observation, in my regular work throughout the state, I find FYLER'S RED MITE DESTROYER to be quite generally used, and that it is giving absolute satisfaction.

Under field tests, one (1) application has given freedom from Red Mites for a period of one (1) year. How much longer it will last yet remains to be seen.

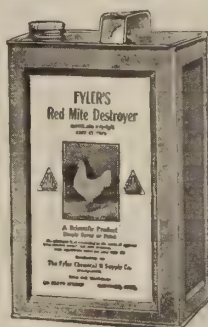

FYLER'S RED MITE DESTROYER has some particular advantages in that it can be easily applied with a sprayer and, when used for general disinfecting, will mix readily with either kerosene or whitewash.

Very truly yours,

REJ/ENV

Gentlemen:-

Sometime ago you sent us five gallons of Fyler's Red Mite Destroyer. It has been very interesting to us to give this material a thorough try-out, checking with several other mixtures commonly sold.

In the year which has elapsed since the application was made we have noticed no deterioration and it certainly eliminated the red mites which were present when the original application was put on. We find it the easiest to apply of any material which we have ever used for this purpose.

I congratulate you on the quality of the material as a whole.

Very truly yours,

C. E. Lee.

CEL:MM

C. E. Lee, Head
Dept. of Poultry Husbandry.

"BEST BY TEST"

Simply spray thoroughly the roosts, dropping boards, nests, and wall near them with Fyler's Red Mite Destroyer once or twice a year and keep your poultry house free from this costly pest. The increased egg production from mite-free birds more than offsets the slight cost of the material.

Fyler's Red Mite Destroyer is used and recommended by most of New England's leading poultry raisers. One trial will convince you—as it has thousands of others. See preceding pages for a few typical endorsements.

Farmington, Connecticut

February 11th 1929

Fyler Products Inc.
135 - Grove St.,
Hartford, Conn.

Gentlemen:

We have been using Fyler's Red Mite Destroyer for several successive years with satisfactory results, as a preventative.

It will, however, effect a cure also should red mites be present. We use a spray pump to spread it around the perches, dropping boards and nests; a small amount going a long way in this manner.

Yours very truly,

CULMOR LEGHORN FARM,

LAG:G.

Owner.

Eliminating **Poultry Worms** WITH **VERNOX**

**A SIMPLE, EFFECTIVE TREATMENT FOR BOTH
TAPE AND ROUND WORMS**

Poultry requires periodic worming—all authorities agree on this.

The Vernox method is best—individual treatment in tablet form—one tablet for an adult bird—that's enough to remove both round worms, tape worms, and some cecum worms in a few hours.

The Vernox way insures that each bird gets proper treatment—it's easy to treat a flock—use catching crate or treat when birds roost at night.

Vernox tablets are scientifically prepared—they don't disintegrate in crop or glandular stomach, but act when they reach the worms lower down.

We guarantee Vernox—"Satisfaction or Money Returned." Vernox is packed 50 tablets to a box.

"The Vernoxed bird loses the worm."

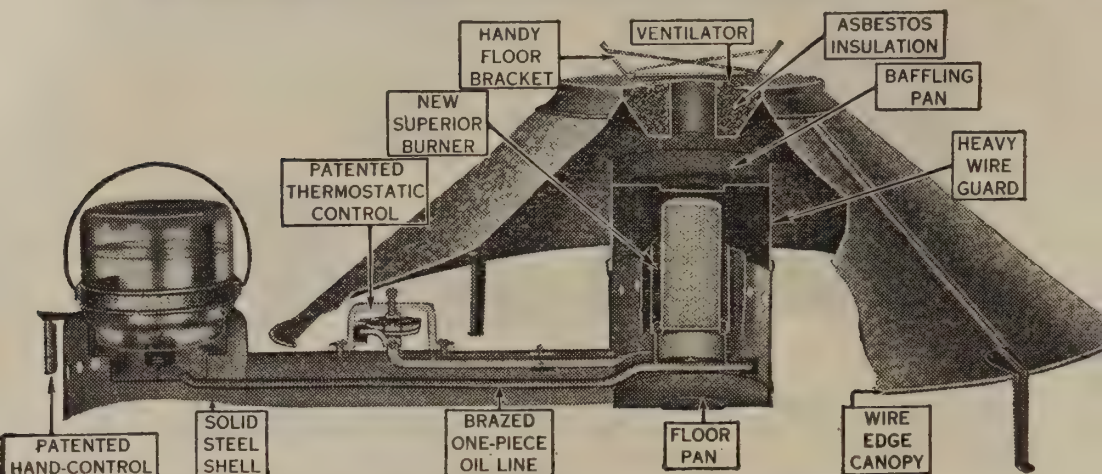

Packed 50 to the box

MAKOMB

"OIL-O-STAT"

Oil Burning Brooder.

GENERAL DESCRIPTION

The Oil-O-Stat is the culmination of efforts to provide a brooder with the following attributes—Broods any number of chicks, safe guarded under any weather conditions, requires the minimum of attention and will not go out while fuel supply lasts, explode or cause fire, subject chicks to smoke or gas as it is connected to a chimney the same as a coal brooder. All these at a reasonable price. The construction is ample and heavy allowing 16 ft. of flame to travel three times completely around heater.

The Oil tank is of galvanized steel, 20 gallon capacity, or one may attach a 55 gallon barrel. Note: The overflow safety pipe from the burner to the outside of the poultry house. The Oil-O-Stat is absolutely automatic, needs no priming to start and is economic to operate.

THE NEW TWIN BLAST BURNER

Consider these new low prices—

Stove complete without Canopy	\$22.00
With 52" Canopy	26.00
With 62" Canopy	28.00

The 900 and 1200 Egg sizes are double decked 450 and 600 Egg machines, and all trays conveniently open to the same side.

"Electric equipment for same price on request."

FYLER'S ENTERITIS POWDER

FOR PARALYSIS TREATMENT IN POULTRY

Directions sent with each shipment

Inflammation of the intestines, called enteritis, may cause poultry to lose use of limbs. They continue to have a good appetite for some time, but lose weight rapidly, finally dying in a very emaciated condition. It does not pay to fuss with birds in advanced stages, but Fyler's Enteritis Powder is recommended for use when first symptom are noticed.

**ROY E. JONES, Extension Poultry Specialist,
Connecticut Agricultural College, says:**

"Enteritis Powder has done more good than any other one thing used for enteritis and paralysis."

Our powder is prepared under a formula designed and recommended by the Extension Service of the Conn. Agricultural College. This ought to be sufficient indorsement for any progressive poultryman.

The cause and transmission of the enteritis condition has not yet been discovered.

This powder is very reasonable in price. One pound is enough for 100 mature birds. Fed in the drinking water or mixed with mash.

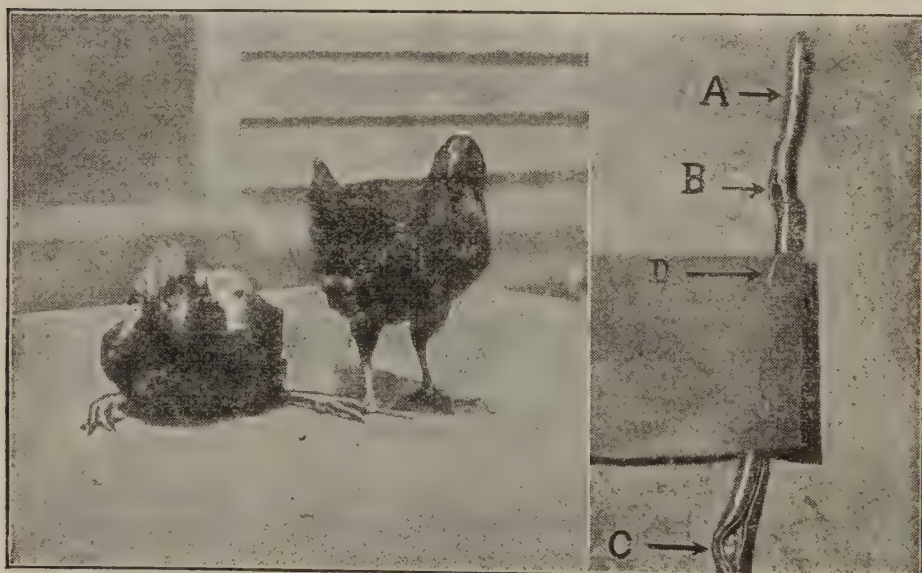

Prices:	1 lb.	\$.60	10 lbs.	\$4.80
	2 lbs.	1.10	25 lbs.	11.00
	5 lbs.	2.50	50 lbs.	22.50
			100 lbs.	44.00

DIRECTIONS.

Feed one heaping teaspoonful to each gallon of drinking water. Feed for one week, skip one day while giving salts in drinking water or wet mash at the rate of 1 pound to 100 mature birds; then continue Enteritis Powder for one week longer.

FEED IN MASH.

After the two weeks' treatment, Enteritis Powder may be fed for several weeks in the mash at the rate of one pound in each 100 pounds, either following the two weeks' treatment in water as used for disease control or may be fed regularly as a preventative.

Bird on left paralyzed, due to enteritis

Section of intestine: (A) uncut portion; (B) to (C) slit open, showing characteristic rolling back of the thickened, rubbery intestinal wall, due to enteritis condition; (D) round worm, proportionate size.

FYLER'S TESTED COD LIVER OIL

Means
Health and More Eggs
For Your Laying Hens
AND QUICKER, SOUNDER GROWTH
For Baby Chicks

NORWEGIAN COD LIVER OIL

BETTER BE SAFE THAN SORRY

Pertinent Facts Pertaining to Cod Liver Oil

The administration of Cod Liver Oil to poultry is to provide in the highest form of concentration the vitamins which are essential to the health and growth of the birds.

The development of Cod Liver Oil along poultry lines followed years of research in connection with Rachitis in young children and in this product was found in best available form the Disease Combating Elements known as "VITAMINS".

You expect, of course, that the money you spend on Cod Liver Oil will come back to you manifold in the improvement of your flock.

Remember that you are buying Vitamins, the stored up energy in good oil—not tannery nor soap-making oil.

There is so little difference in price between Fyler's Pure Tested Cod Liver Oil in bulk and that asked for common grades, why experiment? Such experiments are costly, as both time and money are wasted.

According to the recommendation of the Experimental Station, Connecticut Agricultural College, Storrs, Conn., one-half per cent of total feed or one pint to one hundred pounds of mash or scratch feed, should be Cod Liver Oil.

These conditions apply to the use of Fyler's Tested Cod Liver Oil. Oils which may not have the same high Vitamin Content would naturally require an increased dosage.

Caution—Don't expose Cod Liver Oil to sunlight, and keep as tightly corked as possible.

Connecticut Automatic

Wouldn't you breathe a sigh of relief if you knew that your hens would have a supply of fresh water always? The Conn. Automatic Water Fountain will do this. The water level is controlled by a float and valve on the feed pipe. A constant water level is maintained automatically. A drain pipe is located in the center of the pan. The drain plug which also serves as an overflow can be quickly removed to flush out the fountain into a dry well below. We advise flushing the fountain once each day to remove the particles of mash and other material that come off of the chickens' beaks while drinking.

LABOR SAVER—MONEY MAKER

Everyone who has taken care of poultry in large flocks knows that watering is the greatest single labor item and that lugging or hauling water is a never-ending task. Running water is a necessity and the Conn. Automatic Poultry Fountain is an economy paying for itself many times over in the labor saved. Another fact that cannot be over-estimated is the increase in production due to the hens always having a fresh supply of clean water at a proper temperature in cold weather.

VAN DYKE FARM

Day Old Chicks

1334 New Britain Ave.,
West Hartford, Conn.

Feb. 5, 1929.

Fyler Products, Inc.
Hartford, Conn.

Gentlemen:—

I just received three more Connecticut Automatic Poultry Fountains and wish to say that I am very well satisfied regarding the results shown in the production of eggs since they were installed. No more wet litter, no more frozen water pails. We have also noticed how much more time we have for other purposes. Water pails have been entirely discarded.

Very truly yours,

VAN DYKE FARM,

E. B. Van Dyke.

Poultry Fountain

The fountain is constructed of extra heavy galvanized iron, machine rolled and seamed, bound with iron at the top of the pan and at the base with all joints carefully soldered. The fountain is good for years of continuous service. This is demonstrated by the fact that many have been in constant use for six to ten years.

This fountain can be used for laying hens and winter broilers equally well. It will supply 200 to 300 hens and as many chicks as you can keep in one pen. When used for hens a low platform beneath it helps to keep the water clean and the litter dry.

May also be used for baby chicks.

NON-FREEZING

As each customer has his own ideas and his own problems on heating to solve, we quote fountain without heater.

Some use oil lamps, others electricity—a bulb in the water or heating unit.

(Also see Junior Fountain page 50)

CONN. AUTOMATIC POULTRY FOUNTAIN JUNIOR

Patented

We are pleased to announce a new Automatic Fountain essentially the same construction as the Conn. Automatic Poultry Fountain listed on pages 48, 49, but designed to furnish automatic water service in small pens.

We suggest the use of a 50 or 60 watt carbon bulb; where electricity is not available we will furnish an oil lamp at no extra cost.

These fountains are conveniently packed one to a case and may be shipped via parcel post in the first, second zones, postage extra. (Also see Conn. Automatic Poultry Fountain Senior, pages 48, 49).

SOMETHING NEW

The CHIC-HEN Giant Feeder

After years of watchful waiting, the poultry public is presented with the "Chic-Hen Giant Feeder" which will with simple adjustment feed chicks, growing stock and hens, keep all feed clean and not waste. It will meet all of the requirements of the several hoppers which have in the past been required to carry poultry from chicks to old age. There is not another feeder made which will meet all of these requirements.

"Chic-Hen Giant Feeder" Specifications.

Adjustable to feed day-old chicks, growing stock, and laying hens.

Adjustable for inside and outside use.

Waterproof, dirt proof, and dust proof.

Does not clog or waste.

Easy to fill and simple to adjust.

Holds 100 to 150 pounds of feed.

Feeds either grain or mash.

Built of heavy galvanized metal throughout.

Built so that birds absolutely cannot roost on it.

Size, 4 feet long, 16 inches wide for chicks; 24 inches wide for grown birds, when so adjusted.

Think of it { One hopper does the work of several
Saves labor and saves feed
Prevents disease through sanitary protection.

You can ask for but one more requirement—that is, low cost and value considered.

We have it:

One feeder\$11.75

Two feeders 10.75 each

Twelve feeders 9.75 each

The reduction will be allowed on a single feeder providing the order for twelve (12) is completed within thirty (30) days. Positively cash with order or arrival draft attached to bill of lading F. O. B. shipping point.

MIWONDER GLASS POLISH

Indispensable if you wish to clean and polish glass, silver or metals in a jiffy. Used by chauffeurs, automobile owners, housewives, restaurants, any store where glass cases must be polished, especially fine for soda fountains, absolutely will not harm the surface.

Spread a little with the sponge enclosed in each can, do not cover the entire surface, however. Immediately wipe off with a dry cloth. It works in a jiffy.

50c can—\$6.00 doz. postpaid to second zone.

PASTOXINE

The New non-poisonous exterminator of Rats and Mice prepared by Pasteur Vaccine Laboratories, Paris, France. Absolutely harmless to man, all domestic animals and poultry. Net contents 70 grams semi-liquid paste.

Price per box \$1.00, delivered.

FEED MOLASSES

Amolco Seal High Test Feed Molasses is the pure product of Porto Rico sugar cane, made by the "old-fashioned" process. This method gives Amolco Seal Molasses all the natural and nourishing healthful properties because of its high sugar and low ash content.

Amolco Seal Molasses is a high test centrifugal, cane molasses and is not the ordinary New Orleans or sugar house molasses. It is important to bear this in mind, because, by its process of manufacture the New Orleans molasses loses some essential natural nutrients which you get in Amolco Seal Molasses.

JUDGING FEED MOLASSES

A large majority of poultry farmers and dairymen, however, fail to realize that there is molasses—and MOLASSES, and that in order to give the desired result, molasses must meet a certain standard. We give below an average analysis of our AMOLCO Seal High Test Feed Molasses.

FYLER PRODUCTS, Inc.
135 Grove St.,
Hartford, Conn.

Gentlemen:-

Having used your Fly Killer for several years at my home dairy farm, especially for spraying cows, I can cheerfully recommend its use to dairymen looking for the comfort of animals, so that the maximum production of milk may be maintained during fly time.

Very truly yours,

Thomas Holt
Dairy and Food Commissioner.

FYLER'S RED MITE DESTROYER

Reference

THE MUTUAL BANK AND TRUST CO., Hartford, Conn.

Co-Operation

The Fyler Chemical & Supply Company, Inc., and Manufacturers Distributing Company, both of Hartford, Conn., have combined their efforts and will continue their business with all who were operating separately under the new name of Fyler Products, Inc. with headquarters at Hartford, Conn. Shipments to be made either from Hartford, Boston or other points.

A larger volume of business at one point reduces overhead expense and makes possible better service to our trade on a bigger and better line of products. All assets of the above have been acquired by the Fyler Products, Inc. Kindly send all orders to Hartford to Fyler Products, Inc.,

W. G. Fyler, President.

Our Guarantee

We guarantee any article we sell to you to be satisfactory to you or money refunded.

"Our products stand alone on what they do for you; not what you think of them."

Fyler Products, Inc.

W. G. Fyler, President.

NOTICE

IF YOUR DEALER DOES NOT HANDLE the article you want send dealer's name and address to us and we will ship on receipt of price. (Use order blank).

FYLER PRODUCTS, Inc.

135 Grove Street,
Hartford, Conn.

Plenty of parking space on our street.

A convenient parking and auto washing station in the rear and rates that are reasonable. Auto repair shop also adjacent.

FYLER'S *RRP/R* RED MITE DESTROYER

THE WONDER SPRAY

"BEST BY TEST"

Recommended by
ROY E. JONES
Conn. State Poultry Expert,
Storrs, Conn.

Simply spray roosts, roost supports and walls adjacent to roost ends with Fyler's Red Mite Destroyer and be rid of this costly pest.
